

Script for explaining the Youtube

My name is Hatsawat Intrasad. Today I would like to introduce you to a youtube application that is useful for entertainment or finding information. Moreover, YouTube can make passive income.

In today's everyday life, we can be stressed very easily so we should find entertainment to make us feel better. YouTube is the perfect choice because it is a platform that brings together a huge amount of media around the world.

To use YouTube, creating an account is optional. However, having an account will enable you to access all of its features. YouTube has a system called a subscription. This allows users to follow the content of the channel. If you subscribe to a certain channel or watch something on YouTube, it will give you similar content. YouTube usually displays ads while you watch video clips. However, to remove ads and access more features, there is an optional subscription-based service called YouTube Premium. To use YouTube Premium, you need to pay for the service. There's also YouTube Studio for content creators, YouTube Music for music lovers, and YouTube Kids for kids content.

YouTube offers a wide variety of videos that can be accessed from anywhere and at any time over the internet, catering to both educational and relaxation needs, YouTube also has an intuitive and user-friendly interface and is accessible for all ages.

Besides generating entertainment, YouTube allows content creators to monetize their content by uploading it and attracting subscribers. Content creators on YouTube can earn more money based on the number of subscribers and views their videos receive. Some of them make enormous amounts of money. Even if anyone can apply and upload their content, YouTube can help everyone earn money or create a career from their videos.

So the YouTube application is a popular choice for many people, as it not only provides entertainment but also offers an opportunity to earn significant amounts of money from anywhere in the world, as long as you have an internet connection. Thank you.
